

HUBERT XU

Toronto, ON · hubertx98@gmail.com · hubert-xu.com · github.com/Isolumi · linkedin.com/~hx

EDUCATION

University of Toronto

Bachelor's of Computer Science

Deans List Recipient (2023)

September 2022 - June 2027

SKILLS

Languages: Python, C, C++, Rust, JavaScript, TypeScript, Java, SQL
Frameworks/Tools: NodeJS, FastAPI, ExpressJS, Spring Frameworks, Next.js
Machine Learning: CUDA, PyTorch, Triton, NumPy, OpenCV, OpenClaw, MCP
DevOps: Docker, K8s, NGINX, AWS, GCP, Azure, Cloudflare, Linux, Terraform, Kafka

EXPERIENCE

Amazon

Software Developer

Vancouver, BC

May 2026 – July 2026

- Architected an in-house **content management system (CMS)** powering targeted resource portals for Amazon employees and external users, eliminating third-party dependencies to drive tighter platform integration.
- Decreased engineering time by **77%** for new feature rollouts through an extensible module architecture, and reduced page creation time by **26%** by integrating internal AI tooling to streamline the authoring workflow.
- Supported **on-call** operations and resolved **20+** tickets, reducing average triage time by **20%** by deploying root-cause code fixes and updating runbooks and documentation.

MedMe Health (YC W21)

Software Engineer

Toronto, ON

May 2025 – December 2025

- Architected and deployed a production **Computer Use Agent (CUA)** enabling bidirectional data synchronization across third-party healthcare platforms to support U.S. enterprise onboarding for Fortune 500 customers, directly enabling a **7 figure annual contract pipeline**.
- Built a resilient automation pipeline combining **vision-language models** for data extraction, UI automation, and template-based visual navigation, increasing successful happy-path workflows by **43%** and decreasing costs by **72%** while gracefully handling dynamic layouts and edge-case failures.
- Implemented end-to-end observability and performance metrics across automation services, **reducing SEV response time by 300%** and enabling proactive detection of bottlenecks impacting enterprise reliability.

UofTHacks

President

Toronto, ON

May 2024 – Present

- Engineered and managed platform infrastructure with Next.js, FastAPI, NGINX, and Cloudflare for **4,000+** total users and **700+** concurrent users.
- Implemented edge caching, request routing, and performance optimizations to improve Core Web Vitals and **increase application traffic by 184%** year-over-year.
- Managed and mentored a team of **60+ executives**, delegating tasks and fostering a collaborative culture.

PROJECTS

npm (Open Source Contributor)

JavaScript

- Identified and fixed a critical vulnerability resolution bug in **metavuln-calculator used by npm audit**, restoring detection for prerelease package versions and improving security coverage across the npm ecosystem.

MiniLLM

Python, Triton, CUDA

- Built a LLM serving engine exploring prefill/decode execution, grouped query attention, RoPE, paged KV caching, and **speculative decoding**.
- Optimized and profiled GPU inference using FlashAttention Triton kernels, **KV cache quantization**, and NVIDIA Nsight Systems/Compute.

CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals (AZ-900)
